EDUCATION

Bachelor of Technology CSE ICAI UNIVERSITY, Hyderabad CGPA : 8.77	2022 - 2026
Intermediate MPC Priyadharshini Junior college, Huzurnagar Percentage : 97.1%	2020 - 2022
High School Krishnaveni School Huzurnagar Percentage : 93.1%	2019 - 2020

EXPERIENCE

Alladi Cloud Solutions (Parent Company: Brainyway) Java Developer Full Time	June 2026 — Present
Developing the Local Taxi application end-to-end, working across frontend mobile development and backend development.	
3Zen Consulting Private Limited Intern Junior Software Engineer	January 2026 — June 2026
Actively designing and building real-time microservices-based applications using Spring Boot, including the development of Product Management Service and User Service integrated with Spring Security for authentication and authorization.	
Skill banc Intern Developer	June 2024 — July 2024
Developed animated mathematics lessons, improving the clarity of complex concepts while enhancing technical and creative skills in building engaging educational content.	

SKILLS

Programming Languages: Java, Sql, C, Python

Web Technologies: Spring Boot, Flutter

Cloud & DevOps: AWS

Computer Science Concepts: DBMS, Object-Oriented Programming, Data Structures & Algorithms, Operating Systems, Computer Networks

Tools & Platforms: GitHub, IntelliJ, MySQL, Postman, VS Code, MongoDB, Jupyter Notebook

Certifications: AWS Academy Cloud Foundations (AWS); Java Course-Mastering the Fundamentals (Scaler); Microsoft Azure AI-900 (Udamey)

Soft Skills: Communication, Problem-Solving, Time Management, Adaptability, Collaboration, Teamwork

PROJECTS

Product Catalog and User Authentication Service

- Designed a scalable system to manage products and categories with full CRUD operations, validation, and meaningful error handling.
- Developed using a microservices architecture, integrating a separate User Authentication & Authorization Service.
- Implemented endpoints for signup, login, token validation and logout using BCryptPasswordEncoder and token-based session management.

Tools :- Spring Boot, Postman, IntelliJ IDEA, JPA/Hibernate, MYSQL, BCryptPasswordEncoder

Face Recognition and Grouping

- Built a face recognition tool for clustering and organizing images using face_recognition and HOG detection.
- Added webcam-based real-time recognition and user-friendly interface with rename and ZIP features.

Tools & libraries :- Python, OpenCV, HOG model, NumPy, TensorFlow, Jupyter Notebook

Document Hub

- Built Document Hub which is a file management app with folder creation, notes, PDF maker, file uploads, and camera integration.
- Implemented theme customization and colorful UI to enhance usability and user experience.

Tools :- Flutter, Dart, Android Studio
